PROFESSIONAL SUMMARY

Data Operations and E-Commerce Operations professional with 3+ years of experience across Flipkart and multi-marketplace operations. Experienced in Python, SQL, Advanced Excel, Power BI, MIS reporting, inventory analytics, automated reporting and e-commerce workflows. Improved Instock availability to 98% and reduced stockouts by 25% through data-driven replenishment planning. Hands-on with Generative AI tools including ChatGPT, Google Gemini, Claude and Microsoft Copilot, with experience in AI-assisted coding, prompt engineering and workflow automation.

TECHNICAL SKILLS

Data & Programming: Python, SQL, Pandas, NumPy, Advanced Excel, Power BI, Streamlit, OpenPyXL

Analytics & Reporting: MIS Reporting, KPI Reporting, Dashboard Development, Automated Reporting, Data Cleaning, Business Analytics, Inventory Analytics, Pricing Analysis

AI / ML: XGBoost, Scikit-learn, Classification, Regression, Forecasting, NLP, TF-IDF, SVM, Generative AI, Prompt Engineering, AI-assisted Coding

E-Commerce: Inventory Management, Order Processing, Catalog Management, Pricing, Replenishment, Marketplace Operations, Returns & Claims, FBA, FBF, Seller Flex, Viniculum, Unicommerce

PROFESSIONAL EXPERIENCE

Data Operations Analyst — TeamLease Services | Deployed at Flipkart | Bengaluru | Sep 2024 – Sep 2026

- Build and maintain daily/weekly MIS reports and performance dashboards using Advanced Excel, SQL and operational data to track KPIs and support management decisions.
- Analyze SOH, DOH, Fill Rate, Instock%, Sell-through and PO Aging data to identify exceptions, replenishment gaps and inventory performance trends.
- Analyze replenishment and operational data across 16+ product verticals, improving Instock availability to 98% and reducing stockouts by 25% through data-driven planning.
- Use Excel formulas, PivotTables, lookups, charts, sorting, filtering and conditional formatting to transform large datasets into actionable operational insights.
- Manage NPI and FSN buy-ready workflows by validating margin/compliance approvals, completing master additions and contract creation, enabling timely PO creation, and coordinating delivery appointments.
- Resolve centralized catalog issues across 16+ product verticals, including product attributes, EAN changes, grammage, usage instructions, ingredients and manufacturer information.
- Identify repetitive reporting and data-processing activities and structure them into standardized, repeatable workflows for improved accuracy and turnaround time.

E-commerce Operations Executive — Lavian LLP | Jul 2023 – Aug 2024

- Managed end-to-end e-commerce operations for 16,000+ SKUs across Amazon, Flipkart, Myntra, Ajio, Meesho, JioMart and Shopify, covering inventory management, order processing, pricing and catalog operations.
- Managed FBA, FBF and Seller Flex shipments through Amazon Seller Central, including shipment creation, inventory movement and fulfillment coordination.
- Used Viniculum and Unicommerce for channel-wise catalog mapping, inventory synchronization and order management across multiple marketplaces.
- Managed product listings, attributes, product grouping and promotions through Flipkart Seller Hub and other marketplace seller platforms.
- Managed return orders and marketplace claims, investigating order/fulfillment discrepancies and coordinating resolutions with logistics and marketplace teams.
- Managed inventory availability, stock tracking and order processing workflows to support timely fulfillment and minimize operational issues.
- Created Excel-based MIS reports and dashboards for sales, inventory, aging and marketplace performance using PivotTables, VLOOKUP, formulas, charts and conditional formatting.
- Analyzed seller, sales, pricing and product-performance data to identify operational gaps and support data-driven marketplace decisions.

AI / ML PROJECTS

E-Commerce Commercial Performance & Sales Control Center | Python, Streamlit, Pandas, NumPy, OpenPyXL

- Built a multi-page Streamlit application delivering commercial intelligence on GMV, MRP sales, G2N dilution leakage and Blended AOV.
- Built Pandas ETL pipelines to ingest, sanitize and aggregate FY25/FY26 transactional data with multi-dimensional YoY analysis.
- Engineered an automated Excel reporting engine using OpenPyXL with multi-level headers, programmatic formatting and dynamic column sizing.

Credit Card Fraud Detection | XGBoost

- Developed an XGBoost-based fraud detection model achieving 97% classification accuracy while reducing false positives by 30%.

AI Resume Classification | TF-IDF, SVM, NLP

- Built a TF-IDF and SVM-based NLP system to automate resume classification and candidate screening.

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science — JNTUK University, 2023

Data Science Program — ExcelR Solutions, 2023 | Certifications: Google Analytics, RapidMiner ML, ExcelR Data Science
