

MOHAMMAD KATTUBADI

Data Scientist | Machine Learning | XGBoost | Python | SQL | NLP | Recommendation Systems

Bengaluru, Karnataka | +91-6304396311 | miraclemohammad786@gmail.com | LinkedIn: [linkedin.com/in/kattubadi-mohammad/](https://www.linkedin.com/in/kattubadi-mohammad/) | GitHub: github.com/kattubadimohammad | Portfolio: github.com/kattubadimohammad/TechWithMohammad

PROFESSIONAL SUMMARY

Data and analytics professional with 3+ years of experience across Walmart, Flipkart and multi-marketplace e-commerce operations. Hands-on with Python, SQL, Pandas, NumPy, Scikit-learn, XGBoost, Power BI, Advanced Excel, ETL and workflow automation. Built machine-learning and NLP projects in fraud detection, resume classification and recommendation systems, with experience translating operational data into actionable business insights.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, Jupyter, Data Cleaning, Data Transformation, Data Wrangling

Machine Learning: XGBoost, Scikit-learn, Classification, Regression, Forecasting, Feature Engineering, Model Evaluation, NLP, TF-IDF, SVM

Recommendation & Modeling: Collaborative Filtering, Nearest Neighbors, Recommendation Systems, Predictive Modeling

Data Engineering: ETL Workflows, Data Validation, Data Quality, Aggregation, Automated Reporting, Workflow Automation, OpenPyXL

Analytics & BI: Power BI, Advanced Excel, PivotTables, VLOOKUP/XLOOKUP, Dashboards, KPI Reporting, Business Analytics

Tools: Streamlit, Git, GitHub, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Analyst – Sourcing Transformation — Walmart | Bengaluru | Sep 2026 – Present

• Joined Walmart in September 2026. Current responsibilities and achievements are intentionally not expanded with unverified details.

Data Operations Analyst — TeamLease Services | Deployed at Flipkart | Bengaluru | Sep 2024 – Sep 2026

• Built and maintained daily and weekly MIS reports and performance dashboards using Advanced Excel, SQL and operational datasets to monitor KPIs and support management decisions.

• Analyzed SOH, DOH, Fill Rate, Instock%, Sell-through and PO Aging data to identify anomalies, replenishment gaps, inventory risks and performance trends.

• Analyzed replenishment and operational data across 16+ product verticals, improving Instock availability to 98% and reducing stockouts by 25% through data-driven planning.

• Validated, cleaned and transformed large datasets using formulas, PivotTables, lookups, charts, filtering and standardized reporting workflows.

• Investigated recurring data and process exceptions, identified root causes and converted repetitive reporting activities into standardized, repeatable workflows.

• Translated analytical findings into operational recommendations for inventory availability, replenishment planning and KPI performance.

E-commerce Operations Executive — Lavian LLP | Bengaluru | Jul 2023 – Aug 2024

• Managed end-to-end e-commerce operations and marketplace data for 16,000+ SKUs across Amazon, Flipkart, Myntra, Ajio, Meesho, JioMart and Shopify.

• Created MIS reports and dashboards for sales, inventory, aging and marketplace performance using PivotTables, VLOOKUP, formulas, charts and conditional formatting.

• Analyzed seller, sales, pricing, catalog and product-performance data to identify operational gaps, trends and improvement opportunities.

• Used marketplace/order-management tools for catalog mapping, inventory synchronization and order-management workflows across marketplaces.

MACHINE LEARNING & DATA SCIENCE PROJECTS

Credit Card Fraud Detection | XGBoost

• Developed an XGBoost-based fraud detection model achieving 97% classification accuracy while reducing false positives by 30%; applied classification modeling to transaction data with a focus on fraudulent patterns.

Resume Classification | NLP, TF-IDF, SVM

• Built an NLP-based resume classification system to automate candidate screening; applied text preprocessing, TF-IDF feature extraction and supervised machine-learning classification.

Book Recommendation System | Collaborative Filtering, Nearest Neighbors, Streamlit

• Built a recommendation application using collaborative filtering and NearestNeighbors to recommend similar books from user–book interaction data; deployed the application with Streamlit.

Flight Price Prediction | Machine Learning

• Developed a machine-learning project for flight-price prediction using data preprocessing, feature engineering and model evaluation.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science & Engineering — JNTUK University | 2023

Certifications: ExcelR Data Science | RapidMiner Machine Learning | Google Analytics
